

**REMARKS*****Summary of the Amendment***

Upon entry of the above amendment, a Substitute Specification will have been entered to ensure the record is correct.

***Request for Entry of Substitute Specification***

In reviewing the Official File on the U.S. Patent and Trademark Office PAIR system and the published U.S. Application, Appellants note the amended specification appears incorrect. In this regard, while it appears the paragraph numbers identified in Appellants' preliminary amendment were incorrect, these amendments were properly entered by the U.S. Patent and Trademark Office personnel. However, it also appears the non-amended paragraphs were inadvertently deleted from the specification.

Accordingly, to ensure that the record is correct, Appellants are concurrently submitting a request to enter a Substitute Specification that includes the changes made during the prosecution of the instant application. Further, as this Substitute Specification merely enters previously submitted amendment, with revised paragraph numbering, no separate marked-up copy of the Substitute Specification is required.

Accordingly, entry and consideration of the Substitute Specification is hereby requested to ensure that the record for the pending Appeal is clear.

***Application is Allowable***

Thus, Applicants respectfully submit that each and every pending claim of the present invention meets the requirements for patentability under 35 U.S.C. §§ 102 and 103, and respectfully request the Examiner to indicate allowance of each and every pending claim of the present invention.

***Authorization to Charge Deposit Account***

The undersigned authorizes the charging of any necessary fees, including any extensions of time fees required to place the application in condition for allowance by Examiner's Amendment, to Deposit Account No. 19 - 0089 in order to maintain pendency of this application.

**CONCLUSION**

In view of the foregoing, entry and consideration of the attached Substitute Specification is requested.

Respectfully submitted,  
Alain FOUERE et al.
